Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the examiner has considered applicants' response filed October 19, 2004 and the remarks/arguments therein. Applicants argue that by maintaining the concentration of water in the reaction mixture or reaction zone to no more than six weight percent, as per the instant invention, they are able to achieve improved process results, especially selectivity to the desired ketone products. Upon further consideration of U.S. Patent 5,583,263, which was relied upon by the examiner for the rejection of record, the examiner concedes that there is no teaching or suggestion in the reference that low water concentration has the benefit of increasing the selectivity to the desired ketone product, specifically a C₇ ketone. Accordingly, the examiner has withdrawn the rejection of record; the instant claims are now allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sikarl A. Witherspoon whose telephone number is 571-272-0649. The examiner can normally be reached on M-F 8:30-6:30.
